

SOAP...

It is something we all use every day, several times a day. But did you ever give much thought to its importance in your life.

Soap has an intriguing story. From its beginning at the dawn of mankind, to its present usage and manufacturing techniques, soap is a fascinating subject.

Come spend some time with us at Ladies Night at the Central Theater Wine Shoppe, on February 3rd at 6:30 PM. We will discuss the history and different types of soap and answer the question...

"Why should I buy a bar of handcrafted"

In the course of the evening, we will demonstrate the soap making process from the very beginning with the mixing of the oils to the final process of cutting the bars. We will describe the differences between fragrance and essential oils, show the various techniques of coloring the soap and explain how we know when a bar is ready to be used.

We will have a selection of soaps, including Valentine's Day soaps, for you to look over. Who knows, maybe you will come away with a new hobby!
